Application for State Approval of Teacher Preparation Specialty Programs

Michigan Department of Education, Office of Professional Preparation Services
P.O. Box 30008, Lansing, Michigan 48909
Phone: (517) 335-4610 *** Fax: (517) 373-0542

Directions:
- For each new, amended, or experimental program, a separate application is required.
- Application and all documentation are to be submitted electronically.
- Fax or mail only the cover page (Page 1) that is signed by the dean or director.
- All correspondence regarding this application should be addressed to the appropriate consultant identified in Attachment 1.

V. Program Information

Program Summary

Prepare a program narrative (5-6 page maximum) which:

- Describes the philosophy, rationale, and objectives of the specialty program and explains how the program is consistent with the philosophy, rationale, and conceptual framework of the unit.
- Describes the sequence of courses and/or experiences to develop an understanding of the structures, skills, core concepts, ideas, values, facts, methods of inquiry, and uses of technology.
- Describes how candidates are prepared to utilize a variety of instructional approaches to address the various learning styles of students.
- Describes any differences that may exist between elementary or secondary preparation to teach in each major or minor area (e.g., instructional resources, field placements, instructional techniques), if applicable.
- Describes how the program incorporates gender equity, multi-cultural, and global perspectives into the teaching of the subject area.
- Describes how the program prepares candidates to use multiple methods of assessment appropriate to this specialty area.

Program Coursework

Complete Attachment 3 showing the required and elective courses for this program. This list should include the following information.

- Contact person for specialty program.
- Course title and number.
- Number of semester hours for required and elective courses.
- Designation for elementary, secondary, or K-12 certification.
- Course descriptions.

Please refer to the Quick Reference Chart at:

SECONDARY EDUCATION SOCIAL STUDIES CERTIFICATION PROGRAM APPLICATION
PROGRAM SUMMARY

Goals of the NMU Teacher Education Program

The mission of the NMU Teacher Education Program is to provide candidates a challenging, relevant and rewarding experience that will allow candidates to acquire professional competence.

The goals to achieve this mission are as follows:
• Understand the role and operation of the school;
• Respect and work effectively with students of varying backgrounds and cultures;
• Assume the various responsibilities of the classroom teacher;
• Plan instruction and learning experiences that recognize the individual needs and differences of students;
• Organize and manage the classroom environment to maximize learning;
• Manage classroom interactions and student conduct to create a positive climate for learning;
• Identify and use appropriate instructional techniques, media and methods;
• Evaluate learning to determine the extent to which instructional objectives are achieved by students;
• Establish positive and effective communication with students, parents, colleagues, administrators and community members;
• Accept and assume the responsibilities associated with being a competent professional and lifelong learner; and,
• Practice being a reflective teacher.

Conceptual Framework for NMU Teacher Education: Philosophy, Rationale and Objectives

During the Fall of 2006 and Winter of 2007 Northern Michigan University Teacher Education faculty reviewed, revised, and readopted the April 2000 Conceptual Framework presented in full here. Below, we provide an overview of our conceptual framework which begins with a definition of education. Israel Scheffler (1976) offered the following:

[Education is] the formation of habits of judgment and the development of character, the elevation of standards, the facilitation of understanding, the development of taste and discrimination, the stimulation of curiosity and wondering, the fostering of style and a sense of beauty, the growth of a thirst for new ideas and vision of the yet unknown (p 206).

In addition to a definition of education, three questions shaped the development of our conceptual framework: (1) What is the nature of teaching, both as we practice it and as we wish our candidates to? (2) What are the models of learning we wish to develop in our candidates and practice within our faculty? (3) What is the knowledge base we wish to incorporate in our instructional program? The answers to these questions culminated into five Derivatives that describe our framework. In what follows, we provide a brief introduction to our derivatives with a direct reference to a primary source that helped guide our thinking.

Derivative #1: Habits of Judgment and Development of Character [Scheffler (1965, 1976); Schön (1983)]
Taking this derivative seriously commits us as a faculty to developing both habits of mind and habits of the heart that will lead to a practice steeped in reflection and judgment and based in the
ethics that define good character.

**Derivative #2: Teaching as Artistry [Eisner (1998)]**
As an ethical activity, teaching requires, among other things, that teachers value their students. Valuing as in appreciation carries a connotation of the aesthetic. That is, teachers must exhibit artistry in the practice of their craft and must develop in becoming a connoisseur of excellent teaching which is essential to becoming an excellent teacher.

**Derivative #3: Subject Matter Content as Medium [Shulman & Wilson (2004)]**
A derivative that explores subject matter content as medium arises from Scheffler’s definition of education and our claim that teaching is an art, grounded in ethical and aesthetic qualities. The artfulness of teaching is a fusing of pedagogy and content that we recognize, as Shulman did, as pedagogical content knowledge. Teachers make pedagogical judgments about what content to address and how to design classroom experiences that will assist students in engaging this content as a means to expand and deepen their own learning. The task of the teacher is to design learning experiences that will enable students to develop their own capacity for understanding (i.e., form habits of judgment, etc.).

**Derivative #4: Race, Culture, and Social Justice [Banks & Banks (2004)]**
A derivative that explores race, culture, and social justice attempts to call into question the social and political agenda in this country that has long included (and in some ways continues to be) the myth of cultural assimilation and the practice of racial hegemony in the pursuit of multicultural education. Banks and Banks (2004) describe the dimensions of multicultural education as: (1) content integration, (2) the knowledge construction process, (3) prejudice reduction, (4) an equity pedagogy, and (5) an empowering school culture and social structure (p. 20). Drawing on our view of education, as embodied in Scheffler’s definition and Banks and Banks multicultural education, we must include a commitment to providing experiences that foster a critical understanding of the central role of race, cultural and social justice.

**Derivative #5: Technology [AACTE (2008)]**
Technology as a knowledge base, medium of instruction and communication, and medium of research and professional development offers possibilities to educators at all levels. In exploring a derivate that addresses technology, we do not intend to imply that technology in and of itself is as fundamental to our conceptual framework as our other derivatives; however, technology clearly is a component of our work, as a means to an end and not an end in itself. Technology pedagogical content knowledge must serve to promote and ensure collaborative and ethical work, must engage users in critical and creative thinking and problem solving that supports candidate construction of meaning, must be weighted in light of student diversity and cultural differences and most essentially social justice and equity of access and opportunity (the digital divide).

Courses in the content area majors and minors have course goals and objectives aligned with the NMU Conceptual Framework. [The conceptual framework and program philosophy for students](##), cooperating teachers and faculty are outlined for each phase of the program clearly showing how Pre-Methods, Methods and Student teaching coursework align. All degree requirements are made available to students and faculty through the university bulletin.

**Sequence of Courses and/or Experiences to Develop an Understanding of the Structures, Skills, Core Concepts, Ideas, Values, Facts, Methods of Inquiry, and Uses of Technology**

Our program is designed with an emphasis on candidate development through three program phases, coupled with blocked courses, and integrated field experiences. The phases are: Phase I – Pre-Methods;
Phase II – Methods; and, Phase III – Student Teaching. Each phase is based upon a set of indicators from the Professional Standards for Michigan Teachers that are linked to the Final Evaluation of Student Teacher.

Entry into the Professional Education Sequence, as defined by the Teacher Selection and Retention Standards, requires a 2.7 minimum GPA and a demonstration of basic skills in the areas of reading, writing and math. To maintain enrollment in the education sequence all candidates must maintain a 2.7 GPA in their overall, major(s), minor(s) and professional education sequence areas through all program phases.

NMU requires all graduates to complete a world cultures course prior to graduation.

Upon entry to the Professional Education Sequence candidates complete Phase I: Pre-Methods consisting first of ED 201 Introduction to Education and ED 301 Dimensions of American Education where students explore and situate themselves within the profession. These courses require students to develop their philosophy of education, interview practicing educators, and to define the legal and ethical obligations of their profession. Phase I continues with ED 231 Teaching for Learning in the Secondary Classroom which is a learning theory course situated in a middle school and supervised by the instructor of record. Candidates are placed in their content areas for this experience.

Meeting the GPA requirements in all areas listed above and a passing score in all three areas of the MTTC Basic Skills allows candidates to apply for methods. Phase II: Methods is conducted over the course of two semesters and is situated in local schools and students must complete a methods application to this phase of the program. Building upon their content course requirements and pre-methods learning, candidates complete lesson planning with classroom teachers at all building grade levels focusing on unit development and delivery, reading assessments, individualized and differentiated instruction and instructional technology all consistent with the Michigan High School Content Expectations. Candidates are expected to integrate their content area into ED 361 Special Education and the General Classroom Teacher to plan and assess for students with special needs; ED 319 Teaching of Reading for Secondary Teachers; ED 483 Educational Media Technology to plan and assess teaching and learning according to PSMT Standard 7; HS 350 Methods and Materials in Teaching Social Studies Education; and ED 349 Teaching for Diversity, Equity and Social Justice in the Secondary School Community.

Candidates in the methods phase are required to actively participate in secondary school settings. Candidates are assigned to classroom teachers for 30 hours in each methods course. Candidates plan and reflect on their teaching under the guidance of an NMU professor and the classroom teacher. Lessons delivered in these settings are designed around the High School Content Expectations and support the local curriculum delivered in the school setting.

Admission to Phase III: Student Teaching requires the candidate to complete a pre-application two semesters prior to the experience and an application one semester prior. Candidates can request a split placement or a full semester placement in their content area. Candidates are individually reviewed to determine which student teaching experience will best support their needs. All elementary candidates complete ED 430 Teaching in the Secondary School where candidates take on the responsibilities of the classroom teacher with mentor support from a cooperating teacher and a university supervisor. To model and guide the reflective practice outlined in our conceptual framework, all candidates participate in ED 450 Seminar in Teaching. All candidates must obtain a level of “Proficient” from their cooperating teacher(s), university supervisor and self in all categories on the Final Evaluation of Student Teacher to successfully complete the program. Candidates who obtain a level of “Proficient,” provide evidence of CPR/First Aid completion and passing scores on all MTTC elementary and subject area tests are
Preparation to Utilize a Variety of Instructional Approaches to Address Various Learning Styles of Students

All courses in the Professional Education Sequence incorporate the need to address varied individual learning styles through each phase of the program. The Pre-Methods Phase uses ED 201 and ED 301 (foundations) to facilitate understanding of learning styles within the context of society as a whole. ED 231 (teaching for learning) provides classroom instruction and 30 hours of on-site field experiences to allow students to observe and plan for these varied approaches. As candidates move into the Methods Phase there is a direct application of their pre-methods courses as they plan, implement and reflect upon lesson delivery in classrooms with varied populations and learning styles through the integration of HS 350 (social studies), ED 349 (diverse learners), ED 319 (reading), ED 361 (special education) and ED 483 (technology). Application of these learning styles in multiple secondary grade level settings during methods supports the transition to the Student Teaching Phase (ED 430) where they are applied and assessed over the course of a semester through the Final Evaluation of Student Teacher, a final portfolio and a mock interview.

Gender Equity, Multi-cultural, Diversity and Global Perspectives

All courses in the Professional Education address the study of gender, multiculturalism, diversity and global perspectives. NMU requires all students to complete a World Cultures requirement prior to graduation. The pre-methods foundations courses (ED 201 & ED 301) expand on that world view as it relates to schooling. The pre-methods learning theory course (ED 231) expands on this knowledge through its immersion in a local school setting and a required field experience to the Nah Tah Wash School in Escanaba, MI. Nah Tah Wash is a tribal school and affords candidates the opportunity to work extensively with minority students in a secondary setting.

All methods courses (ED 361, ED 319, ED 349, ED 483, HS 350) are field based and situated in the Marquette Area Public Schools which is comprised of male and female students, racially diverse populations (85% white; 3.5% African American; .4% Hispanic; 2.6% Asian; 8.2% Native American), students on free and reduced lunch (26.7%), and inclusive classrooms.

The NMU Teacher Education fully supports a candidate’s request to student teach out of the Upper Peninsula. The requests to student teach out-of-area must be rooted in the diversity of the experience the candidate will gain by working with varied populations. Placements in urban and rural areas that meet these criteria are supported around the world. During student teaching, candidates also have the option to complete ED 222 Classroom Management and ED 223 Multicultural Education in addition to the required seminar (ED 450) to facilitate a deeper understanding of these issues per request of the student teacher.

Multiple Methods of Assessment

ED 231 Teaching for Learning in the Secondary Classroom provides an introduction to assessment principles related to teaching and learning. ED 483 Educational Media Technology in methods requires candidates to reflect on their pre-methods learning and to incorporate new learning into a portfolio that demonstrates teaching and learning connected to state and national assessments as supported by the High School Content Expectations in the social studies. The portfolio is a requirement of successful completion of student teaching.

The field based program in the methods phase allows candidates to participate in the development and administration of multiple assessments at local schools under the guidance of classroom teachers and teacher educators.
Lesson plans throughout methods and student teaching are assessed for their ability to measure student achievement as they relate to the individual and interdisciplinary units and plans developed and taught by each candidate. Proficiency in this area is measured throughout the program and assessed upon completion of the program in the Final Evaluation of Student Teacher, a final portfolio and a mock interview.

Collaboration with K – 12 Districts and Regional Service Agencies
Candidates and faculty collaborate with K – 12 districts throughout the Professional Education Sequence. The pre-methods courses begin this collaboration with ED 201 and ED 301 where candidates make individual connections to local classrooms for required assignments. ED 231 is situated in a local school setting and requires 30 hours of participation. Ten of those hours are directly supervised by a teacher educator where candidates be guided in their reflection through common experiences. ED 231 also requires candidates to work in a low-income housing area where they are responsible for developing after school program extensions related to their content area. The methods courses are field based and occur in local middle and high schools.

Support and Professional Development for Teacher Candidates during the Induction Period
Graduates of the elementary program are supported through the induction period in a variety of ways. NMU offers graduate programs in the areas of reading, science, administration, and learning disabilities. These courses are offered on campus and online.

The School of Education collaborates with the Marquette Alger Educational Resource Agency to provide ongoing professional development through the Action in Education Series offered every summer. Workshops and professional development are provided to teachers in the induction years upon request from local districts.

The following centers, conference and resources on NMU’s campus provide ongoing support to teachers during their candidacy, induction years and beyond to help integrate learning across content areas:

- Center for Economic Education and Entrepreneurship
- Seaborg Mathematics and Science Center
- Upper Peninsula Writing Project providing intense summer workshops and course on writing across the curriculum.
- Lydia Olson Learning Resources Center collection of young adult and children’s literature. Classroom resource center also available with kits available for checkout in content areas.
- Upper Peninsula Reading Conference offered fall every other year on odd years at NMU in support of reading and writing across the curriculum.
- Upper Peninsula Special Education Conference offered in February every year on NMU’s campus.
- Uniting Neighbors In the Experience of Diversity (UNITED) offered every fall on NMU’s campus in support of multiculturalism, diversity and equity for all members of the community with a particular focus on schools. Coincides with the UP Indian Education Conference.

Candidate Perceptions of Teacher Preparation Program
Data on candidate performance is collected, analyzed and disseminated by the Associate Dean of Teacher Education and the Director of Field Experiences. Michigan Department of Education data for Secondary Pedagogy in the 2007 – 08 MDE Teacher Exit Survey demonstrate that 93% of candidates felt prepared to teach in their content area. 2008 – 09 MDE Teacher Exit Survey results in Secondary Pedagogy show 94% of candidates felt prepared to teach in their areas. NMU surveys all teacher candidates, cooperating teachers and university supervisors in these areas as well through the use of survey tool (Final Evaluation of Student Teacher) designed to reflect the Professional Standards for Michigan Teachers. A review of
these data for fall 2007 through winter 2010 show that student teachers self report a level of “Proficient” in the areas of “Content Area Knowledge” (94.7%) and “General Knowledge” (93.1%). Cooperating teachers assessed elementary candidates at 98.1% and 95.6% “Proficient” and university supervisors ranking elementary candidates at 94.6% and 93.8% “Proficient” respectively.

Candidate perceptions of the program in the area of technology are also reflected in a 95% efficacy score on ELSMT 7 of the 2007 – 2008 MDE Teacher Exit Survey and a score of 97% on the 2008 – 2009 MDE Teacher Exit Survey ELSMT 7.

### VI. Content Guidelines/Standards Matrix

See attachment at: [http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndstandardsfinal.pdf](http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndstandardsfinal.pdf)

### VII. Supporting Documentation

| Field Experiences                              | • Describe how candidates for majors and minors in specific specialty programs participate in early field experiences in K-12 schools.  
|                                               | • Describe aspects of the student teaching experience for certification candidates that enhance the applicants’ abilities to teach in this specific specialty area. Are candidates in your institution assigned to K-12 classrooms as student teachers in both their major and minor (if applicable)? |
| Instructional Methods                          | • Describe how candidates are prepared to teach in this specific specialty area. |
| Course Descriptions                           | • Provide descriptions of all courses contained on Attachment 3. Descriptions must provide enough information to show that standards could logically be met in these courses. |
| Syllabi                                       | • Provide a representative syllabus for each required course (those listed on Attachment 3 and referenced in the standards matrix). |
| Faculty                                       | • Please complete the Instructional Faculty table from Attachment 5.  
|                                               | • Include all faculty teaching the courses shown on the Summary of Course Requirements for Specialty Program (Attachment 3), including those who may be temporary or non-tenure stream.  
|                                               | • List additional faculty positions that will be added if this program is approved. |
| Technology                                    | • Describe how this program will utilize technological resources. |
| Vocational Work Experience                    | • If applicable, please describe the structure and content of the required vocational work experience program. How is this evaluated? |

SECONDARY EDUCATION SOCIAL STUDIES CERTIFICATION PROGRAM
APPLICATION
SUPPORTING DOCUMENTATION

Field Experiences
Phase I field experiences introduce role orientation and conceptualization.
In role orientation ED 201/301 (Introduction to Education/Dimensions of American Education), the candidate learns what becoming a teacher requires and is introduced to the profession of teaching. Field experiences at this stage involve visits to schools and classrooms to observe the nature of schooling and teaching to get a general knowledge of the role of the schools, classrooms and teachers. In ED 201/301 students have a field experience requirement of spending one-half day in a 6-12 classroom. This exposure is to help candidates to better know if teaching is for them. They are required to interview the teacher they observe concerning their roles and responsibilities and their feelings about teaching.

ED 231 (Teaching and Learning in the Secondary Classroom meets in an area middle school and candidates spend 30 hours in a classroom in their content area. Candidates are required to complete additional course hours by visiting a Native school under the direction of the instructor. The purpose of these field experiences are to provide a significant measure of contact with students in a school setting in order to better understand the course content as it relates to their content area and varied school populations. As the first significant field experience in the education program, this assignment also provides candidates with a beginning opportunity to understand the dynamics of teaching and learning. Each candidate is expected to establish a working relationship with classroom teachers during this field experience. Professional demeanor is both learned and practiced in this field experience.

Phase II Field Experiences result from experiences that allow the candidates to practice various aspects related to teaching, such as lesson planning, teaching small groups or micro-teaching. Phase II of teacher education is characterized by learning to become a teacher by allowing opportunities to practice in a learning community.

Candidates in methods courses integrate technology, assistive technology, reading, and diversity, equity and social justice practices in a secondary classroom setting. Field placements are a combination of on-site courses taught and supervised by a professor and 30 scheduled classroom hours beyond course meeting times where the candidate works with a classroom teacher. The on-site teaching is monitored and critiqued by the candidate and the professors in the methods courses. These observations are purposefully used by the professors to drive integrated instructional and behavioral plans for secondary classrooms.

The secondary schools and faculty assist each other to advance the art of practice, i.e., both faculties support the teaching and learning of students and of the candidates preparing to become teachers. The school sites for the courses delivered on site function like “teaching studios” for “pressing” the artistry of practice and developing teachers who “reach” to other educational communities.

The courses situated in the schools create a setting for faculty to engage the candidates in reflection on the knowledge-base for what they are doing and what is being learned by the candidate prior to Phase III - Student Teaching. When the candidates begin the semester of student teaching away from these sites, they will not only demonstrate proficiency on the Final Evaluation of Student Teacher, but will also carry with them new ways of extending learning for all students, diverse students included, and new ways to utilize the various curricular frameworks and standards.
During the Phase III 16 week student teaching experience, the Director of Field Experiences, the Teacher Education Advisory Council (TEAC), and the university/classroom supervising faculties discuss issues related to maximizing the candidates’ practice teaching field experience in Phase III. These include the Professional Standards for Michigan Teachers (PSMT), the preparation of candidates, roles and responsibilities of the university and classroom supervisors, and the kind of expectations to be made of the candidate such as teacher-parent conferences, after-school responsibilities, and uses of technologies to reflect upon practice. Also, the Unit schedules ED 586: Supervision of Student Teaching to support the classroom supervising teachers in their role. These reflections and the planning that result are carried forward to the candidate to drive reflection and revision in the four required student teaching seminars.

The student teaching experience allows for candidates to teach in a 16 week placement or two 8 week placements dependent upon availability of quality classrooms in the requested areas. Candidates may also teach out of state or overseas.

**Instructional Methods**
Throughout their coursework at NMU, candidates are presented with numerous models of instructional design, delivery, and assessment. At the core of their studies is the critical examination and interpretation of multiple sources. In addition to coursework in their content area, our candidates learn multiple approaches to teach that content. Prior to student teaching, candidates teach more than 20 content specific lessons to small groups or whole classes of secondary and/or middle school students. Candidates’ lesson plans are reviewed by peers and faculty prior to delivery. Those practice lessons are observed by faculty. Following each lesson, candidates reflect on their teaching and its connection to course content.

**Course Descriptions**
See Form XX (Attachment 3) Below

**Syllabi**
See Content Guidelines/Standards Matrix at:
[http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndstandardsfinal.pdf](http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndstandardsfinal.pdf)

**Faculty**
See Instructional Faculty (Attachment 5) at:
[http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndfaculty.pdf](http://webb.nmu.edu/Departments/Education/SiteSections/Accreditation/MDEApprovals/2ndSS/ss2ndfaculty.pdf)

**Technology**
One unique characteristic is that NMU is a laptop university. The Laptop Initiative, beginning in 2000, has provided every student and faculty member with a laptop. Our entire campus is wireless and supports the use of collaborative software to engage students with content and social networking from around the world. Use of these technologies is evident in the design of the classrooms in Whitman. Each is equipped with data projectors, document cameras, stereo equipment, and wireless access. These technologies permeate the teaching and learning in our Teacher Education Unit. Faculty work diligently to extend these technologies to the local schools we partner with. The addition of WiMax, emitting a 20 mile wireless signal, has allowed
candidates to continue to extend their teaching and learning into the local classrooms of which we are such an integral part through a more consistent university supported platform.

All secondary education candidates begin the integration of technology during methods. ED 361: Special Education for the General Education Classroom requires students to incorporate assistive technology and Universal Design into lesson planning. ED 483: Education Methods in Technology requires all candidates to utilize appropriate software and hardware as it relates to lesson planning, communication, assessment, professional portfolios and content area specific strategies and resources related to teaching and learning in the content area.

All secondary candidates have courses throughout their program that access a web-based platform to facilitate reflection and discussion related to teaching and learning. Past practice has been to utilize WebCT/Blackboard with a switch to Moodle occurring in the fall of 2010. ED 319: Teaching of Reading for Secondary Teachers, for example, requires candidates to participate in an online discussion board where the candidate responds to and leads discussions in issue related to their practice. In addition, candidates create podcasts, Power Points, digital storybooks, grading programs, newsletters, professional communications, web pages, etc. when applicable to the teaching and learning within the program.

Candidates and faculty are supported in their use of technology for teaching and learning in the following ways: Help Desk to address software and hardware concerns; Center for Instructional Technology in Education where faculty can go to learn about, experiment with, and get advice and assistance with a variety of instructional technology tools; Instructional Media Services which provides access to instructional media, equipment, support services and works to improve the classroom environment; online communication and information resources related to the program clearly modeled and posted on the School of Education website. Technology integration is assessed through individual courses and assessed on the Final Evaluation of Student Teacher through specific indicators related to technology.

---

*1 Endorsements for the Social Science group (formerly CX), the Science Group (formerly DX), the Business Education group (formerly GX), the Arts Education group (formerly LX), or the Health, Physical Education, Recreation, and Dance group (formerly MX) are no longer program options.

*2 The JX endorsement may not be offered to new candidates after the fall semester of the 2006-2007 academic year.

*3 The “Z” codes are used only by teacher preparation institutions for recommending these grade levels to the Michigan Department of Education (MDE), and do not appear on a teaching certificate.

*4 The MDE will discontinue endorsement effective January 1, 2009.
# Summary of Course Requirements for Specialty Program

**Institution:** Northern Michigan University  
**Date:** 11-1-10

**Specialty Program:** RX Secondary Social Studies

**Program Standards:** [http://www.michigan.gov/mde/1,1607,7-140-5234,5683,6368-24835--00.html](http://www.michigan.gov/mde/1,1607,7-140-5234,5683,6368-24835--00.html)  
**Standards Date:** 6-9-09

**Program Contact Person(s):** Gabe Logan Ph.D.

**DIRECTIONS:** On the matrix below, list the required courses for this specialty studies program. Also, indicate the number of electives and any special considerations that apply. In addition to listing the course title, course number, and course semester hours, please indicate whether the course is required for the secondary major or minor, elementary major or minor, the K-12 major, and/or an additional endorsement.

**Total number of SEMESTER HOURS required for each option offered:**

- 36
- 33

*If the institution assigns a different type of credit, please convert to semester hours.*

Please provide descriptions for all courses contained on the above listing. Descriptions must provide enough information to show that standards could logically be met in these courses.

**Economics: Candidates must complete two of the following three courses.**

- **EC 101**: A survey of the basic principles of economics with an emphasis on their applications to current issues and/or historical events. Major economic structures like the banking system, government and global exchange are discussed. Supply and demand forces and their impact on these structures are addressed.
- **EC 201**: Analysis of price determination and resource allocation in a market economy. Particular attention is paid to individual consumer and producer choice under a variety of market structures.
- **EC 202**: Introduction to theories of national income, employment, prices, money, banking, taxation, government spending, public finance and international transactions.

**Geography: Candidates must complete both courses**

- **ENV 101**: Introduction to the basic scientific principles and concepts surrounding environmental science. Major components of the natural environment including climate, soils, geologic and hydrologic processes are described. Important ecological concepts concerning aquatic and terrestrial systems are discussed. Human influences are evaluated in terms of energy, natural resources, pollution and environmental sustainability.
- **GC 164**: Examination of the culturally induced differences in the world pattern of population growth, resource utilization, language, religion, agriculture, industry, political systems and environmental impact.

**History: Candidates must complete either HS 101 or 102 and 127**

- **HS 101**: Development of culture from the earliest times to 1600. Emphasis is distributed equally among the ancient, medieval and Renaissance worlds.
- **HS 102**: Development of culture from 1600 to the present day. Cultural, social, economic and political ideas and institutions are traced as background to the understanding of contemporary problems.
- **HS 127**: Survey of recent American history from reconstruction to the present. Political, economic, social, cultural, educational and diplomatic facets of the American experience are emphasized.

**Political Science: Candidates will complete one of the following courses**

- **PS 101**: Study of theory, processes and institutions of politics and government in the modern world, with an emphasis on American institutions and politics.
• PS 105: Examination of the nature and workings of American government, with references to its federal character and practical applications.

• PS 203: Introduction to political institutions and processes as seen from a comparative perspective, consideration of the political development process in modern industrial society and comparative study of public policy. European case materials are emphasized.

• PS 309: Study of state and local governments, including political systems and politics. Major emphasis is placed on the structure and operation of Michigan government and politics.

Professional Sequence (secondary)

• ED 201: An introduction to the field of education as a complex social, economic and political institution and career. Students will gain an understanding of their roles in shaping discussion of significant issues such as equality of opportunity, diversity and multiculturalism within the context of an ever-changing profession.

• ED 231: Course introduces secondary education majors to developmental, behavioral, and cognitive learning theories and processes. Students develop insights into the adolescent learner, secondary classroom practices, and learning. The course includes field experience outside of class.

• ED 301: An exploration of historical, philosophical, ethical and legal dimensions of American education. Students will begin to consider their roles as educational leaders and advocates for social justice for all students in American schools.

• ED 319: Methods the content area teacher can use to help students comprehend course materials more effectively, to determine reading needs of students and to adapt instruction to their needs. Field experience is required.

• ED 349: This course addresses issues of diversity, equity, and social justice at the secondary level within a cross-disciplinary framework, focusing on four areas of knowledge: teaching strategies, authentic performance assessment, classroom management, and uses of technology.

• HS 350: Teaching of the social studies at the secondary level. Course covers the objectives, the organization of subject matter, the evaluation and use of materials and the development of classroom procedures and techniques.

• ED361: An introductory course covering the range of handicapping conditions, designed for the elementary or secondary teacher to develop an awareness of the emotional, educational and social implications of handicaps and to formulate practical applications when working with students with exceptionalities in the general classroom.

• ED 430: The opportunity for a gradual, guided introduction of students in the secondary education curriculum into assuming responsibility for teaching, together with related activities, while they learn to translate theory into practice.

• ED 450: This course is designed to help the student teacher better understand and apply education principles and theories in full-time classroom teaching experience. It focuses on the roles, responsibilities, issues and concerns of student teachers such as classroom management, instruction, assessment, multicultural education, human relations, employment, policy and practices.

• ED 483: Focuses upon the education/instructional uses of audiovisual media including computers and related technologies. Emphasis will be upon each type of hardware and software and its use as well as the subject-matter areas that most easily integrate the technology.
