Computer Power Saving Instructions

1. Right click on your desktop and select Properties.

2. In the Display Properties box, select the Screen Saver Tab on top.

3. In the Screen Saver tab, select the Power button in the bottom corner.

4. In the Power Options Properties box, select the Power Schemes tab.

5. In this tab you can adjust the settings for your usage including System Hibernation.

6. Next you can select the Hibernate tab at the top to ensure that the Enable Hibernation box is checked.
