Geography at NMU
The Geography Department offers a variety of programs in human geography, earth science, physical geography, geographic information science, planning, environmental conservation, and education, along with a certificate program in geographic information systems (GIS). The department is committed to excellence in teaching and preparing students for graduate study, professional careers in teaching, governmental service and the private sector.

Since geography is an integrative discipline, students, whether interested in its human or physical aspects, must have a basic understanding of the scope of the discipline and its methodologies. This is reflected in the department’s core curriculum, which all geography students are required to take. It consists of courses in human and physical geography, three methods classes and a capstone course that integrates the human and physical aspects of the discipline by focusing on the interactions between humankind and the natural environment.

Geography majors have the opportunity to gain practical work experience through internships with local governmental agencies and the private sector.

Department/Program Policies
As a requirement for graduation, all non-teaching geography department majors must have a minimum grade of “C” and a minimum cumulative grade point average of 2.25 for all courses constituting the major curriculum. Students majoring in secondary education earth science, secondary education geography, or minoring in geography education or earth science education must maintain a grade point average of 2.70 or greater with no grade below a “C” in the professional education sequence, the major and/or minors and required cognates combined.

Students in the geographic information system certificate program must have a minimum grade of “B” in all courses in the technical concentration.

Students in the geographic information systems minor must earn a grade of “B” in all classes.

Students majoring in programs in the department must also do the following:
1. Successfully complete EN 211 and pass the NMU Writing Proficiency Exam before taking 300-level courses or above in the major.
2. Complete AIS 101 if required during the freshman year or within the first year of transferring to a major in the department.
3. Satisfy the prerequisites for each major course enrolled in as described in this bulletin.

Note: Petition for exception to any of the program policies must be made in writing and submitted to the Geography Department. The petition must include reasons why an exception should be made and provide documentation of those reasons, if applicable.
Bachelor Degree Programs

Liberal Studies: Complete information on the liberal studies requirements and additional graduation requirements, including the health promotion requirement, is in the “Liberal Studies Program and Graduation Requirements” section of this bulletin (38-44).

Courses within each major that can be used to satisfy liberal studies requirements are listed with the Roman numeral (in brackets) that coincides with the liberal studies division the course falls under.

Earth Science Major

This major provides students with a thorough knowledge of Earth’s physical environment including its geology, weather and climate, astronomical relationships and hydrology.
