

# Information Systems

This program provides a basic foundation of knowledge in the computing area and the ability to apply computer theory to business applications. Graduates find employment in organizations ranging from small firms to large corporations as computing technicians, providers of help desk services and software trainers.

The Information Systems associate degree is a great way to enter the work force with a degree under your belt. It will also benefit you by applying towards a four-year business degree should you choose to go that path later in life.

Job opportunities in the technology areas are diverse and growing in number. Graduates of NMU's program find employment in organizations ranging from small firms to large corporations. People-oriented career paths lead to positions as computer consultants, analysts, trainers, help desk managers, and high tech marketers. Alternate careers as software programmers, database managers, Internet specialists, and network administrators tie technical skills to the support and use of computer systems.

## Skills and Competencies

As in most other fields, strong interpersonal communication and organizational skills are a must for a professional. Other valuable skills and competencies specific to the Information Systems professions are: a commanding knowledge of relevant application software, technical reporting ability, the ability to work independently or with project teams. and systems design capabilities.

## Career Development

You should begin the resume-building process as soon as you can. The Academic and Career Advisement Center can assist you with career planning, while Career Services will help you fine tune your resume and look for jobs related to your field. In the meantime, the more hands-on experience you have, the better the chances are that you will find a job. Becoming involved in a professional related internship is a way to develop your professional skills and gain experience. Your academic course work is important as well, so be sure to maintain a high grade point average.

## Additional Considerations

Information Systems is an Associate of Business degree requiring 64 credits to complete. Ideally, this would take two years at 32 credits a year. This would work out to 16 credits a semester.

## Job Outlook

Jobs in the computing field are expected to continue to grow in the coming years. Average salaries range from \$30,000 to \$40,000.
