

After recording a video in Camtasia 9, you will want to produce it into an MP4 video. To do this, click on the **Share** Tab at the top of the Camtasia 9 screen. A drop down menu will appear. Click on the **Local File** option.

A Production Wizard screen will appear. Choose **MP4 only (up to 1080p)** from the drop down menu as shown. Click **Next**.

Name your video and select where you would like it to be saved on your computer. Click **Finish**.

The video will then render and be saved to your computer.
