

## Respondus LockDown Browser Overview

Respondus LockDown Browser™ is a customized browser that increases the security of test delivery in EduCat. When students use Respondus LockDown Browser to access an exam, they are unable to print, copy, go to another URL, or access other applications. The LockDown Browser is only recommended for exams given in a face to face or proctored environment. It is not recommended for completely online environments because there is no instructor present to close the browser if a student loses their internet connection.

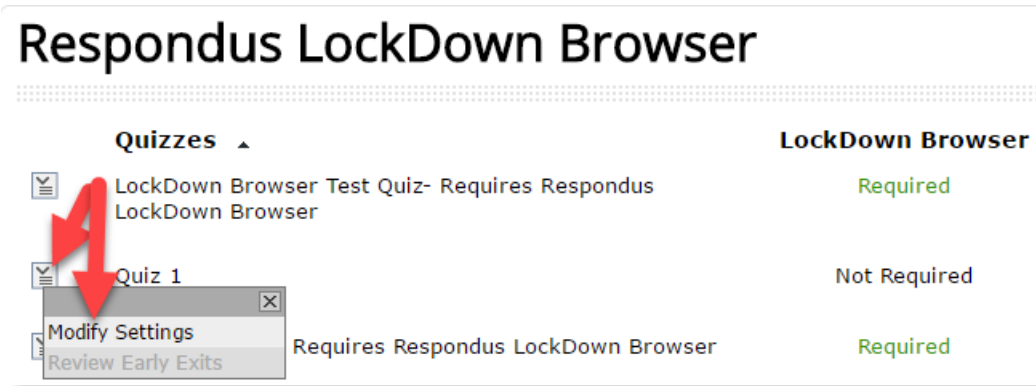

## LockDown Browser —How to

Begin by logging in to EduCat and selecting your course:

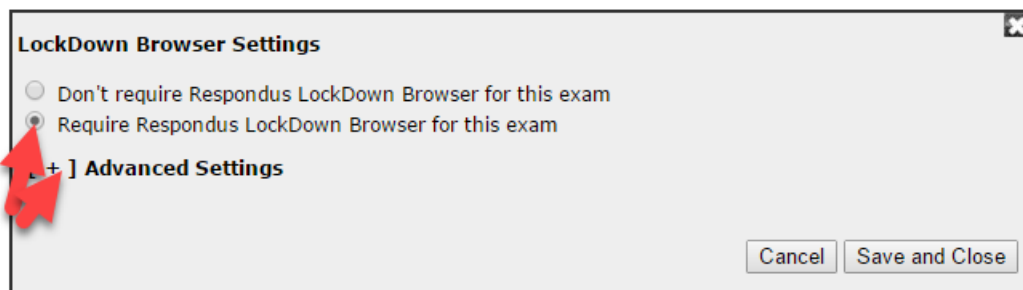

1. Scroll down to the Respondus LockDown Browser block (located in the right-hand column unless you have moved it), and select **Dashboard**.

2. Click the arrow to the left of the quiz for which you would like to require the LockDown browser, and select **Modify Settings**.

3. Select **Require Respondus LockDown Browser for this exam**, and click the plus sign next to **Advanced Settings**.

- Place a check next to **Lock students into the browser until exam is completed** , type a custom password which will allow you to close the browser if a student loses their internet connection, and click the **Save and Close** button.

The quiz is now set to require the LockDown browser. If a student loses their internet connection during the quiz, you can click the **I** button at the top of the student's LockDown browser, click the **Proctor Options** button, type in your custom password. You can watch the student re-establish their internet connection, and restart the LockDown browser to continue the quiz.
