

In Wildcast, a Podcast is a folder that you keep your video files (Episodes) in. To create a new Podcast, Click on the **Create a New Podcast** Button in your **Profile** Screen. Your **Profile** Screen is what you see right after you login.

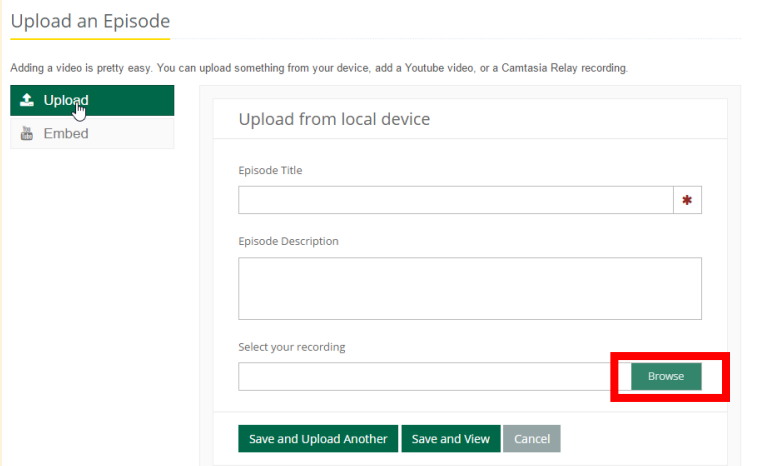

Name your Podcast and provide a title and description for it. Click on the **Create** Button.

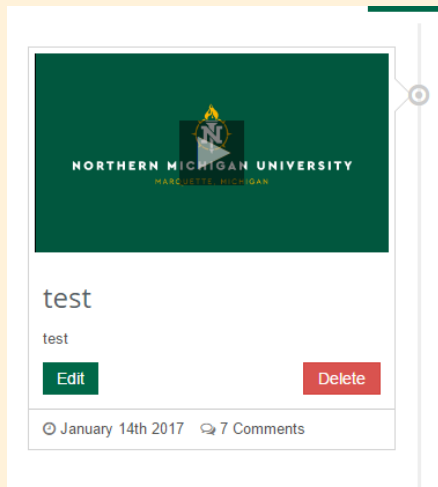

Your Podcast has been created. You are now ready to upload episodes. Click on the **Upload an Episode** Button.

Provide a title and description for the video you are about to add. Next, choose the video to upload using the **Browse** Button. Click on the **Save and View** Button when you are done selecting the file.

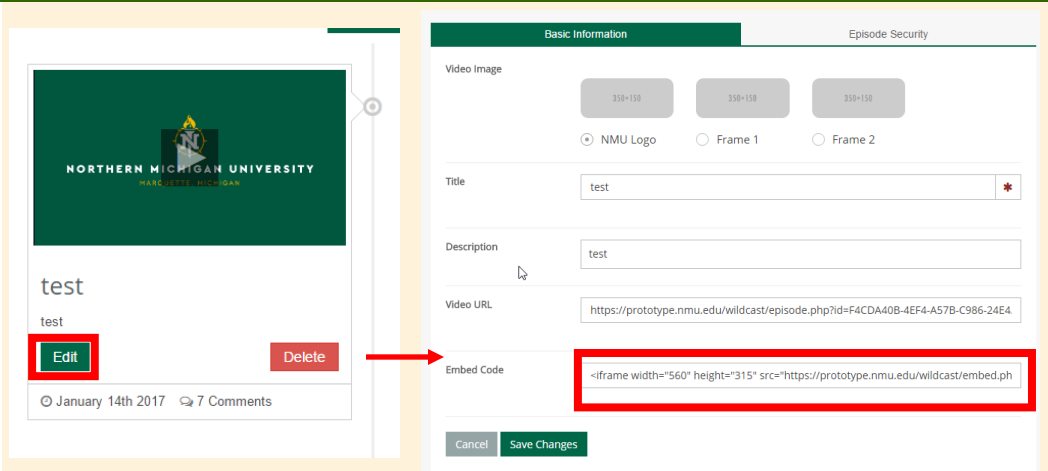

The Episode has now been placed in the Podcast.

Should you wish to edit the Episode or retrieve the embed code for embedding in EduCat, click on the **Edit** Button.

To copy the embed code, highlight and copy all text in the **Embed Code** Textbox to your clipboard.

To delete the Episode, simply click on the **Delete** Button.
