Tech and Occupational Sciences

Archives

Catherine Oliver, Assistant Professor

Research Interests- Her research interests include authority control issues in archives and libraries, the history of cataloging and indexing, and user search strategies.

Art and Design

Gabrielle McNally, Assistant Professor

Research Interests- McNally's scholarly work currently explores the notions of voice, improvisation, memory, performance, autobiography and gender as they relate to nonfiction filmmaking. As a practicing artist, McNally works in experimental autobiographical and essayistic nonfiction video and performance.

Biology

Donna Becker

Research Interests- Research in my lab involves the study of plant-microbe interactions. The overarching theme involves investigating the microbial ecology of plant-associated microbes and applying that knowledge to improve plant growth.

Advises- General Biology, Microbiology

Robert Belton

Research Interests- I am interested in the communication that occurs between cells during embryonic development, and the miscommunication that results in diseases such as cancer.

Advises- Physiology, Microbiology, Biology

Patrick Brown

Research Interests- Waterfowl ecology, wetlands biology, landscape analysis in support of conservation.

Advises- General Biology, Wildlife Management

John Bruggink

Research Interests- Wildlife ecology and management, population ecology.

Advises- Wildlife Biology, Ecology, Zoology and General Biology

Neil Cumberlidge

Research Interests- Taxonomy, phylogenetic systematics, evolution, physiology, parasitology, conservation, ecology, and biogeography of the freshwater crabs of Africa and Madagascar. Research interests also include the freshwater crabs of Asia, Australia, Europe, and Central and South America.

Advises- Pre-Optometry, Physiology, Zoology

Kurt Galbreath

Research Interests- Historical biogeography of Holarctic mammals and their parasites, host-parasite co-evolution.

Advises- Zoology, Parasitology, Evolutionary Biology

Brent Graves

Research Interests- Behavioral ecology, life history evolution, herpetology.
Advises- General Biology, Ecology, Zoology

Valerie Hedges

Research Interests- Neurobiology of the mechanisms underlying experiential plasticity. Advises- Neuroscience, Neurophysiology, General Physiology, Cell and Molecular Biology

Jennifer Jezylo

Research Interests- Veterinary medicine.
Advises- Human anatomy and physiology, pre-veterinary medicine

Jill Leonard

Research Interests- Fish biology, physiological ecology, migration.
Advises- Fish and Fisheries Biology, Marine Biology, Ecology, Physiological Ecology

Alec Lindsay

Research Interests- Conservation genetics, ornithology, animal behavior, evolution. Advises- Ecology, General Biology, Zoology

Jaime Mancilla

Research Interests: Understanding how the brain processes sensory information, using turtles and rodents.

Erich Ottem

Research Interests- The role of neurotrophic factors and gonadal steroids in the maintenance of neuromuscular junctions and motoneuron dendritic morphology. The influence of gonadal steroids on the physiological functioning of sexually dimorphic nuclei in the endocrine hypothalamus.
Advises- Neuroscience, Neurophysiology, Neuroanatomy, General Physiology, Cell and Molecular Biology, Biotechnology

John Rebers

Research Interests- The current focus of my research is the nature of protein/chitin interactions in the arthropod exoskeleton, or cuticle. I am investigating the protein domains required for cuticular proteins to bind to the polysaccharide chitin, using recombinant DNA techniques to modify the proteins and studying the binding of purified proteins in vitro.
Advises- General Biology, Cellular or Molecular Biology

Alan Rebertus

Research Interests- Ecology of endangered plant flora; roles of disturbances (fire, wind) and large mammals on community and landscape dynamics.
Advises- Biology-Ecology Track, General Biology, Zoology

Josh Sharp

Research Interests- Gene regulation in bacteria, medical microbiology, RNA degradation, regulators of bacterial virulence gene expression, and toxin secretion systems.
Advises- Microbiology, Medically-related Professional Fields.

Roger Strand

Research Interests- Stream ecology, ecohydrology, aquatic invertebrate community ecology and bioenergetics, ecology of Lake Superior, upper peninsula stream conservation.
Advises- Invertebrate Zoology, Ecology.

Katherine Teeter

Research Interests- Population and evolutionary genetics.
Advises- Biology, Zoology, Physiology.

Robert Winn

Research Interests- Chemotherapy resistance in brain tumors, the role of tumor initiating cells in tumor recurrence and the influence of brain tumors on immune function.

Business

Gary Brunswick, Professor

Research Interests- His research interests include marketing strategy, services marketing and e-commerce.
Advises- Marketing

Michael Crum, Assistant Professor

Research Interests- He is currently working on several research papers focusing on the following research and pedagogical topics: (1) how productive entrepreneurship can manifest itself in economies plagued by corruption and substantial regulatory burdens, (2) how entrepreneurs can be successful when they lack legitimacy, (3) how methods of constructing numerical taxonomies (i.e. cluster analysis) can be applied to answer research questions in the field of entrepreneurship, and (4) how Monte Carlo simulations can be used to enhance entrepreneurial finance courses.
Advises- Management

Madison Ngafeeson, Assistant Professor

Research Interests- His general teaching and research interests are in the areas of the adoption, implementation, diffusion and use of information systems in organizations. His major research focus is health information technology management.
Advises- CIS

Gary Stark, Associate Professor

Research Interests- His research tends to fall into two areas--research on teaching and learning and research at the boundaries of Organizational Behavior and Social Psychology.
Advises- Management

Carol Steinhaus, Associate Professor

Research Interests- Focuses on qualitative research (written comments, as opposed to numerical quantitative data) regarding students' reflections and observations about what they learned about themselves, management, etc., from taking classes I teach. This includes the two "active service learning" classes of event planning and event management. I may expand this into analyzing data from the community members and organizations who interact with my students during these courses.
Advises - Management

Chemistry

Brandon Canfield, Assistant Professor

Research Interests- Environmental/analytical chemistry, separation and analysis of plant secondary metabolites and their response as a function of environmental stressors.

Tom Getman, Professor

Research Interests- Inorganic chemistry, synthesis and characterization of boron cluster compounds.

Yu Liu, Assistant Professor

Research Interests- Organic chemistry, synthesis of nano-device based catalytic systems, new cooperative catalysts development and catalytic reaction mechanism studies.

Don Marquardt, Associate Professor

Research Interests- Organic chemistry, synthesis of novel aromatic compounds such as fullerenes, free radical chemistry.

Frankie McCormick, Professor

Research Interests- Organic chemistry, synthesis of compounds with novel electronic properties and radical chemistry synthetic methods.

Mark Paulsen, Department Head and Professor

Research Interests- Physical and biochemistry/theoretical chemistry, computer modeling of enzymatic reactions and protei-protein interactions..

Lesley Putman, Professor

Research Interests- Biochemistry, plant biochemistry, enzymes involved in phytoremediation of bisphenol A, toluene and TCE.

Lee Roecker, Assistant Professor

Research Interests- Inorganic chemistry, synthesis and reactivity of cobalt (III) compounds coordinated by thiourea or thioether ligands.

Eugene Wickenheiser, Professor

Research Interests- Environmental/analytical chemistry, biotransformation of arsenic, biodiesel fuel production, chelation and transfer of metals.

Suzanne Williams, Professor

Research Interests- Biochemistry, structure and function of proteins using various analytical techniques such as ELISA, spectrophotometry, and biocalorimetry, and forensic DNA investigations focusing on trace analysis.

Clinical Sciences

Cathy Bammert, Assistant Professor

Research Interests- Colon cancer and the molecular mechanism of drug resistance

Helen Kahn, Professor

Research Interests- Memory and aging, cognitive neuroscience.
Advises- Speech, Language and Hearing Sciences

Paul Mann, Associate Dean/Director of the School of Clinical Sciences

Research Interests- Diagnostic molecular microbiology

Communication and Performance Studies

James Cantrill, Head and Professor

Research Interests- Research focus on various aspects of environmental communication (i.e., how we communicate about and understand messages related to natural resources and environmental protection). In particular, I examine how people socially and psychologically construct interpretations of and care for places based upon how they have come to see themselves in the environment, or a sense of self-in-place.

Mark Shevy, Associate Professor

Research Interests- Dr. Shevy plans to work on several projects in the psychology of music and media. In the fall, he will be working one or more of the following: 1. An experiment on the way in which music influences the enjoyment of stories. 2. The role of music in the cognitive processing of television ads. 3. The meanings that listeners associate with pop music genres. 4. The influence of music in dance fitness classes such as Zumba.

Criminal Justice

Michael Harrington, Assistant Professor

Research Interests- His research interests include adjustment to prison, jails, judicial decision making, violent crime and victimology.

Kevin Waters, Assistant Professor

Research Interests- Kevin's research interests include criminological theory, sexual assault/domestic violence particularly concerning Native American women, Native American Justice, policing, and drug policy.

Earth, Environmental and Geographical Sciences

Teresa Bertossi, Instructor

Research Interests- Human Geography, Community Planning, Sustainability, Sustainability Education

Richard Eathorn, Assistant Professor

Research Interests- Environmental Studies, Human Geography, World Cultures, Geography of Tourism

Norma Froelich, Assistant Professor

Research Interests- Physical Geography, Weather and Climate, Coastal Storms, Forest Climate

Angela Johnson, Contingent Faculty

Research Interests- Environmental Science, Sustainable Food Systems, Permaculture

Weronika Kusek, Assistant Professor

Research Interests- Human Geography, Cultural Geography, Ethnic Geography

Robert Legg, Associate Professor

Research Interests- Geographic Information Systems, Spatial Analysis, Quantitative Methods, Computer Cartography

Sarah Mittlefehldt, Assistant Professor

Research Interests- Environmental History, Sustainability, Environmental Policy, Environmental Justice

Robert Regis, Professor

Research Interests- Geology, Glacial Geomorphology, Remote Sensing

Matthew Van Grinsven, Assistant Professor

Research Interests- Physical Geography, Water Resources, Carbon Cycling, Biogeosciences

Richard Ziegler, Contingent Faculty

Research Interests- Geology, Maps, Metamorphic Petrology, Hydrogeology

Susy Ziegler, Associate Dean/ Department Head

Research Interests- Physical Geography, Biogeography, Research Methods, Environmental Science

Economics

David Prychitko, Professor

Research Interests- Dr. Prychitko specializes in comparative political economy and the history of economic thought, with a focus on the Austrian School of economics.

Education, Leadership and Public Service

Mitchell Klett, Professor

Research Interests- My research focus is developing specific guidelines for introducing research into undergraduate courses by creating a database of types of research specific for Social Sciences. The field of Social Science Research (Sociology, Education, and Psychology) can be categorized as two groups (or three) analyzed quantitatively or qualitatively. Research will include: The essentials of research design. When and how did research design develop (historical context)? What do the research studies inform?

Carl Wozniak, Assistant Professor

Research Interests- I have two projects in mind: 1) Using technology to track teacher and student movement: A feasibility study. This project uses indoor Bluetooth beacons to explore meter-level tracking of individuals in the classroom and aerial photography to track individuals in outdoor education. 2) Orthographic mapping of glacial and erosional features using aerial drone photography.

Engineering Technology

Robert Marlor, Professor

Research Interests- Some of his recent professional interests include wood-connection research, consulting in structural engineering, and teaching engineering courses in Russia.

English

Jon Billman, Professor

Research Interests- Fiction, magazine journalism, creative nonfiction.

Gabriel Brahm, Associate Professor

Research Interests- Literary Theory, Psychoanalysis, Ideology Critique, Israel Studies, Jewish Studies, Holocaust Studies, Film, Popular Culture, Mass Media, Great Books, Political Philosophy, Myth and Religion.

Lynn Domina, Head and Professor

Research Interests- poetry, American literature, African American literature, Native American literature, literature & religion.

Lisa Eckert, Assistant Professor

Research Interests- Her research interests include exploring intersections between literary theory and literacy pedagogy, the role of critical theory in the development of socially just pedagogies in English education, and the influence of graduate education in rural teacher professional development.

Wendy Farkas, Assistant Professor

Research Interests- Her research interests include program evaluation, disciplinary literacy, and digital literacy.

Marek Haltof, Professor

Research Interests- Introduction to Film, Film History, History of Film Theory, Central European Cinema, Authorship in Cinema Adaptations, Film and Propaganda/Politics/Memory, History of Polish and Australian national cinemas, Politics of remembrance in Central Europe, Film and the Holocaust (Central European context), Authorship in Cinema.

Amy Hamilton, Associate Professor

Research Interests- Early American literature, American Indian literature, Chicana literature, Western American literature, Environmental literature and Ecocriticism, Gender and Sexuality studies.

Jennifer Howard, Associate Professor

Research Interests- Editor-in-Chief of the literary magazine Passages North, interested in the writing and editing/publishing of creative work.

Austin Hummell, Professor

Research Interests- Poetry (all of it, Greek to English, and especially prosody), film.

Patricia Killelea, Assistant Professor

Research Interests- Her scholarly research focuses on contemporary experimental Native American poetics and avant-garde literary history.

Caroline Krzakowski, Professor

Research Interests- Twentieth and twenty-first century British Literature, especially Modernism, British literary responses to World War Two, literature and diplomacy, transnational literature, British literature of the postwar period, women's writing.

Zhuang-Zhong Lehmberg, Professor

Research Interests- Anything language related but specifically Chinese and English, Translation studies, Composition/writing center pedagogy and administration, Teaching English to speakers of other languages (TESOL and ESL)

Rachel May, Assistant Professor

Research Interests- Material Culture Theory, Intersectional Feminism, Critical Race Theory, Quilts & Craft Communities, Creative Nonfiction

Elizabeth Monske, Associate Professor

Research Interests- With research interests in online education and faculty training, she has published in Kairos, Computers and Composition, and the Journal of Educational Technology and Society.

Russell Prather, Professor

Research Interests- His scholarly research has focused on the poetry and designs of William Blake and been published in Studies in Romanticism and elsewhere.

Kia Richmond, Professor

Research interests- Dr. Kia Jane Richmond, Professor of English and Director, English Education at NMU interests are 1. improving the teaching of writing and grammar (K-12) 2. improving the teaching of literature (6-12) 3. young adult literature - especially culturally relevant texts 4. mental illness in young adult literature 5. psychology and teaching English

Jaspal Singh, Professor

Research Interests- World Literature; Postcolonial Literature and Theory; Gender and Sexuality Studies; Feminist Theory and Literature; Diaspora Studies; Postcolonial Indian Literature and Culture; Apartheid and Post-Apartheid South African Literature; Turkish Literature and South Asian and Asian Literature and culture.

Laura Soldner, Professor

Research Interests- Composition and literacy pedagogy, the role of reflection in metacognition, and undergraduate student satisfaction and persistence.

Robert Whalen, Professor

Research Interests- His current research interests include the poetry and prose of George Herbert, textual scholarship, and digital editing.

David Wood, Professor

Research Interests- English Renaissance drama, poetry, and prose, Shakespeare, Sidney, and Milton, Psychoanalytic, Gender, and Disability Studies.

Health and Human Performance

History

Chet DeFonso, Associate Professor

Research Interests- Dr. DeFonso's research is focused upon the relationships between the media and political, social, and cultural institutions in Britain from the middle of the Nineteenth Century to World

War II. He is especially interested in the public perception of journalists as the unelected "Fourth Estate" of government.

Robert Goodrich, Professor

Research Interests- Dr. Goodrich's major research interests lie in Modern German history with a broad, integrative approach to the various sub-fields. In particular, his research and teaching emphasize cultural and social history with an eye on the interplay of various factors such as labor, gender, sexuality, and religion, both in Europe and the U.S.

Keith Kendall, Department Head and Associate Professor

Research Interests- Dr. Kendall investigates the influence of medieval religious beliefs on social and political behavior and decisions, particularly in terms of orthodox responses to dissent. Dr. Kendall specializes in how ideas in the sermons of Pope Innocent III related to movements that he thought threatened the medieval European Christian church.

Gabe Logan, Associate Professor

Research Interests- Dr. Logan's teaching and research focuses on U.S. sport history, urban history, Gilded Age immigration, and labor history. Of particular interest to Dr. Logan has been the history of labor unions, as well as how soccer helped to assimilate immigrant populations into U.S. mainstream culture.

Rebecca Mead, Professor

Research Interests- Dr. Mead continues her research on women's political and labor history. Also of interest to Dr. Mead are the metis (mixed Native-White) people of the Southern Great Lakes area.

Howard Nicholson, Assistant Professor

Research Interests- Dr. Nicholson's interests include the old Northwest, upland southern culture in Jacksonian America, and secondary history and social studies education.

Alan Willis, Professor

Research Interests- Dr. Willis is particularly interested in exploring the history of ideas about race and ethnicity. He focuses mainly on how these ideas are shaped by religious belief, especially in American history, African American history, and modern African history.

Math and Computer Science

Jeffrey Horn, Associate Professor

Research Interests- My research focuses on Evolutionary Computation, Evolutionary Robotics, Synthetic Ecologies, Emergent Coevolution, and Artificial Life.

Michael Kowalczyk, Associate Professor

Research Interests- My current primary research interest is holographic algorithms. Other interests include algorithms, computational complexity, software engineering, graphics, and pretty much any kind of mathematics.

J.D. Phillips, Department Head and Professor

Research Interests- Most of my research is in quasigroup, loop theory and automated theorem proving.

Joshua Thompson, Assistant Professor

Research Interests- Geometry, topology, geometric structures on surfaces, complex projective structures, math education, visualizing topology, visualizing data, computational geometry and topology, geometric and topological data analysis, algorithms on manifolds, anomaly detection algorithms.

Bao Truong, Associate Professor

Research Interests- Variational Analysis, Variational Principle, Generalized Differentiation, Multi-objective Optimization, Set-valued Optimization, Welfare Economics.

Military Science

Modern Languages and Literatures

Native American Studies

April Lindala, Director

Martin Reinhardt, Associate Professor

Willis Sojourn, Assistant Professor

Nursing

Philosophy

Antony Aumann, Associate Professor

Research Interests- Dr. Aumann's research focuses primarily on the writings of Kierkegaard and Nietzsche. He also works on contemporary issues concerning the philosophy of art and the emotions.

Zac Cogley, Professor

Research Interests- Dr. Cogley's philosophical interests are in ethics, social and political theory and agency theory. He has current projects on trust, reactive attitudes, anger, the concept of desert, and punishment, among other topics.

Sarah Jones, Associate Professor

Research Interests- Dr. Jones researches issues in epistemology, skepticism, modern philosophy, and feminist theory. She is currently working internationally on aspects of feminist theory in light of women's realities around the world.

Political Science

Jonathan Allen, Associate Professor

Research Interests- Introduction of Political Science, Political Theory and Politics, and Film.

William Ball, Professor

Research Interests- Introduction to Political Science, Comparative Politics, and International Relations.

Brian Cherry, Professor

Research Interests- State and Local Government, Legislative Politics, and Public Administration.

Hanna Kassab, Assistant Professor

Research Interests-international political economy, weak states/failed states, theories of developing nations, and international security.

Steve Nelson, Professor

Research Interests- American Government, Introduction to Law, and Research Methods.

Ruth Watry, Professor

Research Interests- American Government, Constitutional Law, and Women and Politics.

Carter Wilson, Department Head and Professor

Research Interests- Public Policy, Civil Rights Policy, Economic Policy, and Public Administration.

Physics

Dave Donovan, Professor

Research Interests- Dr. Dave Donovan began his career as an experimental condensed matter physicist performing experiments involving structural phase transitions in metals, using x-rays, neutrons, and sound waves. He later spent many years working on space weather conditions using an all-sky imager. Most recently he has been working on sports science applications by using accelerometers to understand motion of human bodies and objects.

Mark Jacobs, Associate Professor

Research Interests- Dr. Mark Jacobs is currently interested in astronomical observation and imaging, working with the NMU observatory. His background is in gravitational lensing and cosmological applications of general relativity.

Neil Russell, Professor

Research Interests- Dr. Neil Russell does theoretical research focusing on testing the theory of relativity. The tool for this is the Standard-Model Extension, or SME, a framework that incorporates a variety of minuscule relativity 'violations.' The effects of these violations, if they exist, are measurable in sufficiently sensitive experiments. His recent research involves using the SME to figure out the signals that arise in various experimental systems. He has also worked on other theoretical topics, including quantum-mechanical supersymmetry and superalgebras.

William Tireman, Associate Professor

Research Interests- Dr. Tireman had a paper titled "Probing the Repulsive Core of the Nucleon-Nucleon Interaction via the $4\text{He}(e,e'pN)$ Triple-Coincidence Reaction" published in *Physical Review Letters* by the American Physical Society. The paper explained results of an experiment conducted in collaboration with scientists at Jefferson National Laboratory and 47 other institutions to measure the nucleon-nucleon interaction at the repulsive core limit on helium-4. The experiment was conducted in 2011 using the high-energy electron beam at Jefferson National Laboratory. Tireman's involvement included constructing 18 plastic scintillation detectors with the help of NMU undergraduate students. He also assisted with experiment setup and data collection.

Psychology

Paul Andronis, Department Head and Professor

Research Interests- Widespread applications of behavioral technology to important social, clinical, and personal behavior problems.

Joshua Carlson, Assistant Professor

Research Interests- Emotion, attention, affective neuroscience, individual differences using behavioral and neuroimaging methods.

Jacob Daar, Instructor

Research Interests- Verbal Behavior, Language Acquisition Therapies, Developmental Disabilities and Autism, Gambling and Risk-taking Behaviors, Animal Behavior, and Organizational Behavior Management.

Adam Prus, Professor

Research Interests- Behavioral neuroscience, Neuropsychopharmacology, mechanisms of action of antipsychotic drugs.

James Suksi, Professor

Research Interests- Industrial psychology, organizational psychology.

Harry Whitaker, Professor

Research Interests- Neurolinguistics; Neuropsychology; History of Neuroscience, Psychology and Medicine; Individual Differences; Research Methods; Technical Writing.

Mounia Ziat, Associate Professor

Research Interests- Human perceptual processes, with an emphasis on haptic perception; multimodal integration, and human computer interaction.

Social Work

Sociology and Anthropology

Yan Ciupak, Assistant Professor

Research Interests- Social Stratification and Mobility, Immigrants, Sociology of Education, Globalization, and Contemporary Chinese Society

Scott Demel, Associate Professor

Research Interests- I am interested in how different ethnic groups have used the Great Lakes throughout prehistory and into the mid 19th century. To fully understand the opportunities available along these inland coasts I also study all aspects of the natural environment and cultural landscape to learn how humans have adapted to this dynamic landscape.

Jeanne Lorentzen, Assistant Professor

Research Interests- Research interests focus on medical power relations and gender, specifically issues relating to medicalization and the social construction of the body.

Alan McEvoy, Department Head and Professor

Research Interests- As an educator and Sociologist I focus on problems of violence and injustice. I have published books and articles on rape, child abuse, youth suicide, domestic violence, bullying, gambling,

and violence in schools. I am especially concerned with helping victims of violence heal, and supporting schools and community organizations in preventing violence.

Guðmundur Oddsson, Assistant Professor

Research Interests- My research interests include social control and social inequalities, particularly the subjective dimensions of class.

Rexin Yang, Professor

Research Interests- The Marriage of Poetry and Social Sciences, Globalization and the Modern World System; World Poverty; Climate Change; Effects of Economic Reform on Family Institution and Women in China, Race and Gender Differences in Status Attainment, Mental Health, and the Quality of Life, in the United States, Alienation, Self-esteem, and Depression
