You can reserve up to an hour per appointment. Use Starfish in MyNMU to set up a time.

You must log into Starfish before 1:00pm if you want to make a next-day appointment.

Email: mkowalcz@nmu.edu

Overview:

This course is focused on client-side web development and single page web applications, on a level beyond what is covered in CS 365.

Course objective:

The objective is simple: foster a significant growth in the student's skill set (in the area of client-side web development and single-page applications) beyond what he entered the course with. Evaluation of this learning outcome will be done in the following way:

1. Find opportunities for growing the student's skill set in the said area.
2. Measure that growth with assignments and/or the final exam.

Grading:

Grades will be based on assignments and a final exam.

85% Assignments

15% Final exam

Exam Date:

The final exam will be on Thursday, May 2 from 12:00noon - 1:50pm. The final exam may be taken earlier if both the instructor and student agree to it.

Academic Conduct:

I work hard, with honesty and integrity; I expect my student to do the same.

Disability Services:

If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Dean of Students Office at 2001 C. B. Hedgecock Building (227-1700). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.
