

Travis Clark *presents*

Your Programming Language Sucks

A lighthearted look at some of the downsides of popular programming languages

Every language has its downsides. Every language has some strange quirks, odd design choices or frightening standards. Nothing is perfect. In this humorous talk, Travis will go over some popular criticisms of several programming languages including:

Java

C++

Javascript

C

Smalltalk

MATLAB

PHP

This talk is intended for Computer Science majors and other programmers, but no specific experience with these languages should be necessary to enjoy the weird and scary side of some of the most popular languages in the world.
